2

3

- 1 Remove make-up from eyebrows, but **DO NOT** degrease, so that the natural skin barrier remains intact as protection. Protect the skin around the eyebrows with a little cream. **TIP:** Combine BROW Lifting with HYAPEP® eye treatment.
- 2 Apply **BROW LIFTING GEL 1** to the brows with the brush.
- 3 Loosely cover them with transparent foil. Exposure time depends on hair structure: 5 - 8 min.

4

5

6

- 4 At the end of the exposure time, carefully lift the foil and test, whether the brows are flexible. If not, extend by 2 min.
- 5 Then test again and extend for another 1-2 minutes if necessary. Only if the brows are flexible, carefully remove GEL 1, e.g. with a cotton pad.
- 6 Thinly apply a small amount of POWER PAD Glue and fix the soft eyebrows in the desired shape with the TRIO TOOL or the Applicator.

7

8

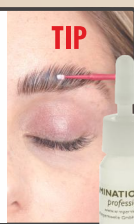

9

- 7 Apply **BROW LIFTING GEL 2**, exposure time: 5 min.
- 8 Remove GEL 2 with a cotton pad. If you intend to tint now, the POWER PAD Glue can remain on the brows as skin protection. Otherwise, it must be removed now with Glue & Roll Remover. Then wipe the brows with damp cotton pads.
- 9 The eyebrows are now smoothed, soft and can be combed into any desired shape. Now start with the **BROW STYLING:** Tint the eyebrows with **BINACIL®**. Exposure time starts at 3 min, longer for more intensity. Then remove the tint and any remaining glue.

10

TIP

11

- 10 Comb brows into desired shape; then begin with the styling (e.g. cutting).
- 11 For the tattoo effect, define the shape with **BROW LINER** and fill the gaps. To finish the treatment, fix the new shape with **BROW FIXING GEL**.

TIP: Revitalize the eyebrow structure with the LAMINATION FLUID professional. This Keratin treatment can additionally be carried out before applying the **BROW LINER** and needs to dry for 2-3 min.

- BROW Styling & care products - for the treatment and for sale!**
- 1-BROW FIXING GEL to fixate the eyebrows in the desired shape
